 Comment Text :

1 -->For a materail that is so dangerous, I do not feel safe having it hauled across the
 2 United States for the next 20 years to Yucca Mountain. It is much better off left in
 3 its orignal site. Nuclear material is going to be a headache for centuries to come.
 The less we use it and have to store it the better off we are. I don't believe that
 Yucca Mountain is the correct answer to the Nuclear waste problem.

Jeff Green
